

## 5x7 RT/LT Pedestrian Pushbutton Plate

Our new double sided push button sign has the advantages over most of the existing signs on the market today. First it has the message and arrow on both sides. This way you can inventory less and not worry about right or left arrows. It is made out of aluminum instead of steel. It will not rust as most on the market today do. It is completely encapsulated in the latest anti-graffiti powder coating that protects the sign from corrosion or graffiti. If the sign is covered with any graffiti, Goof Off or any similar citrus based cleaner will remove it.
