

# Extinguishable Message Sign

## Features

- Meets CalTrans specifications
- Designed for ease of maintenance
- Two line message (customer's choice) up to 11 characters per line

The extinguishable message sign is an internally illuminated unit designed for outdoor use which will produce a clearly visible message only when internally illuminated.

The overall dimensions of the sign are 48" high by 96" wide by 8 3/8" deep. The housing is ruggedly constructed and finished in McCain TGIC polyester powder-coat with all stainless steel fasteners. Two lamp intensity levels power the two VHO lamps. The 10" Highway Series E font message panels are protected by a continuous hinged acrylic lens for durability. The signs run on a 20 amp 120 volt circuit.
