

Illuminated Street Name Signs

500' LEGIBILITY

MINIMUM MAINTENANCE

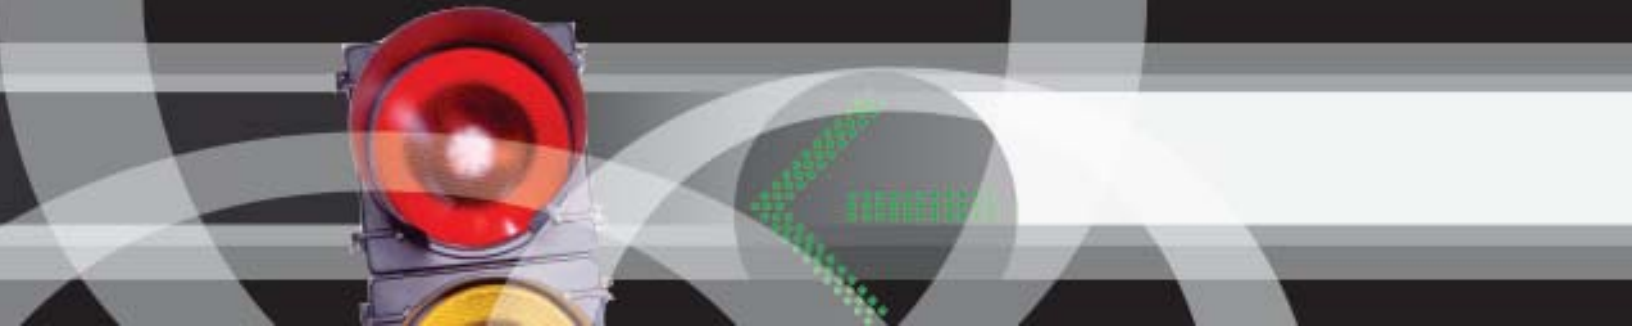

CORROSION RESISTANT

An advantage of the McCain sign is the use of a continuous hinge which allows for easy installation and removal of panels, eliminating the use of screws or welding. This permits easy access to the interior of the sign and results in a frame with no breaks or gaps. Water leakage and corrosion are significantly reduced.

Panels may be customized to suit your special requirements:

- Multiple colors
- Choice of font styles
- City logos
- State shields
- Custom borders
- And Many More

Standard Features

- Top and bottom extruded from 6063 T-5 alloy aluminum with a minimum wall thickness of .082".
- Formed marine grade aluminum

BALLAST:

- High power factor, single lamp, 200 MA, 120 volt 60 cycle (1 per single lamp fixture, 2 per double lamp fixture).

LAMP:

- Each sign is designed to use one or two T12 cool white fluorescent lamps which meet the requirements of ANSI standard (C78).

SIGN HOUSING CONSTRUCTION:

- Use of a continuous hinge on message panels.
- To prevent corrosion, all bolts, nuts and screws inside and out are stainless steel, and thumb bolts are bronze.

MOUNTING ASSEMBLY:

- Bolts and brackets allow easy adjustment of fixture level.
- Optional mounting assembly enables sign to swing freely from mast arm, thus able to withstand wind gusts.

Common Optional Features
