

650VA / 1100VA Hybrid Supercap UPS System

Introducing Marathon Power's cutting-edge uninterruptible power system designed for outdoor, ruggedized applications. These units are a 650VA and 1100VA line interactive system with a 24 VDC Bus and unity output power factor. This high-performance hybrid solution offers exceptional energy density for long life capacity in harsh environments.

Housed in durable chassis suitable for rack or shelf mounting, these units feature a user friendly 4 line LCD panel that displays essential data, parameters, and settings.

Ruggedized UPS Model Features

- Backlit 4-line LCD Display and LED indicators.
- 12A selectable temperature-compensated charger.
- Recessed Anderson Powerpole connectors.
- Fits in all types of outdoor enclosures.
- Low harmonic AC sine wave output in backupmode.
- Fully programmable AC threshold voltages.
- Transient voltage protection from spikes & surges.
- External connections accessible from front panel.
- Six fully programmable dry contacts for greater control.
- Remote access via RS-232, USB & Network.
- Time / Date stamp of events, alarms - up to 100 events.

TRTC-0654-N1 & TRTC-1124-N1

Energy Storage Module Features

- Long life expectancy
- Graphene supercapacitor cells
- No thermal runaway
- Aluminum alloy shell
- Wide operating temperature
- High energy transfer efficiency
- Easy to install
- Low maintenance
- Internal System Protection
