

SWARCO

# McCain ADVANCE WARNING BEACON

FLASHING SIGNAL  
FLASHING BEACON CONTROL BOX  
REFLECTIVE SIGN  
SIGN LIGHT  
POLE

The McCain Advance Warning Beacon attracts attention to important roadside signs or information. Road safety is heavily reliant on a driver's compliance with roadside signs, including speed limits, merging traffic, stoplights, etc. By using a solid state flashing beacon to draw attention to hidden, changing, or approaching road conditions such as an intersection not yet in view, the McCain Advance Warning Beacon increases driver awareness and thereby enhances overall roadside safety.

## KEY FEATURES AND BENEFITS

- Increases roadside safety by warning drivers of hidden or approaching hazards
- Comes standard with rugged high-quality signal housing
- Equipped with reliable solid-state flasher control
- Offers multiple configurations for mounting framework

## PRODUCT DESCRIPTION

The McCain Advance Warning Beacon is ideal for a wide range of traffic applications. Either in a single or dual configuration, the flashing beacon(s) draws motorists' attention to a warning sign alerting them to an approaching hazard.

The signal housing is the same high-quality, rugged product found in all SWARCO McCain, Inc. signal heads. It is available in 8 and 12-inch sizes, fabricated from aluminum or polycarbonate, with or without visors and backplates, and accepts a number of standard light modules.

A powder coated, aluminum McCain Flashing Beacon Control Assembly<sup>1</sup>, featuring solid state electronics, is mounted on the back of the pole to control the flashing of the signal head.

The signs are highly reflective, uniform traffic signs available in standard sizes and messages. Additionally, the signs can be lit with a lamp, and the Type 1 Poles are available in several materials.

## STANDARD FEATURES

### Beacon

- Aluminum or polycarbonate
- Aluminum: powder coated; polycarbonate: colored resins
- Federal yellow, signal green, black, or custom colors
- 72-tooth serrated boss and reinforcing ribs, top and bottom
- 2.0" hole top and bottom fits 1.5" NPT fittings
- Brass threaded inserts for visor attachment (4)
- Terminal block installed
- Stainless steel door roll pins and eye bolt/wing nut assemblies
- Weathertight E.P.D.M. rubber door gasket

### Controller

- NEMA 3R aluminum or galvanized, hinged-door, powder coated<sup>2</sup>, weather-tight enclosure
- 15 AMP circuit breaker protection
- Plug-in solid state flasher (Model 204)
- Plug-in flash transfer dimming relay
- Sign light auto/test switch

### Pole

- Type 1 Pole
- Aluminum, galvanized steel, or fiberglass
- 10' H

### Uniform Sign Panels

- MUTCD and Caltrans
- Various sizes

### Incandescent Sign Light

- Reflector
- Socket, standard E26 Edison screw base

### Mounting Framework

- Aluminum or bronze
- Multiple configurations to match your requirements

## OPTIONS

- 365 day solid state programmable time clock
- Time clock module without dimming relay
- Various signal modules including LED
- Two flashing beacons
- Photocell
- Traffic Signal Visor Heater
