SWARCO
McCAIN PEDESTRIAN PUSHBUTTON PLATES

SINGLE AND DOUBLE SIDED

5" X 7"
9" X 12"

McCain Pedestrian Pushbutton Plates provide instructional data to pedestrians at signalized intersections in compliance with the Manual on Uniform Traffic Control Devices (MUTCD). The plates are mounted immediately above the pushbutton units to inform pedestrians about how to safely cross the street. SWARCO McCain, Inc. has a variety of pushbutton plates to meet all MUTCD pedestrian actuation standards, which include a variety of text and symbol combinations.

Front and back of a 5" x 7" double-sided sign; showcasing left and right arrows.

KEY BENEFITS

- Educate pedestrians at signalized intersections
- Combat vandalism with anti-graffiti coating
- Fabricated from aluminum to prevent rusting
- Meets MUTCD and multiple agency specifications

PRODUCT DESCRIPTION

McCain Pedestrian Pushbutton Plates are manufactured from aluminum and powder coated to prevent rusting.

Each sign is completely encapsulated in the latest anti-graffiti coating, making it easy to remove any paint or markings with common cleaners.

The pushbutton plates are available in 5" x 7" and 9" x 12" sizes in both single or double-sided versions. Double-sided versions are particularly popular on plate designs that feature directional arrows since they include both a right and a left arrow, which can help reduce inventory requirements.

Grommets protect the inner edges of the mounting holes, providing a finished look to each sign.
