Overview

McCain's 334 CCTV Cabinet is the ideal cabinet to house Closed Circuit Television (CCTV) equipment for monitoring traffic flow and synchronizations along major routes and intersections. This sturdy cabinet meets all Caltrans and Federal Highway Administration (FHWA) requirements and has ample room for all required CCTV components. Based on the industry standard 332 cabinet, this cabinet's straight-forward and modular design allow for the easy interchange of standard assemblies and components. With the quality materials used and its hardy construction this dependable, low-maintenance cabinet is the prime choice for all CCTV installations.

Benefits

- Meets all Caltrans and FHWA requirements
- Sufficient space to house all required CCTV equipment
- Full size doors (front and back) provide easy access to the cabinet's large interior
- Standard assemblies assure interchangeability between manufacturers
- Three-point latching system with Corbin or Best locks for maximum security

Product Description

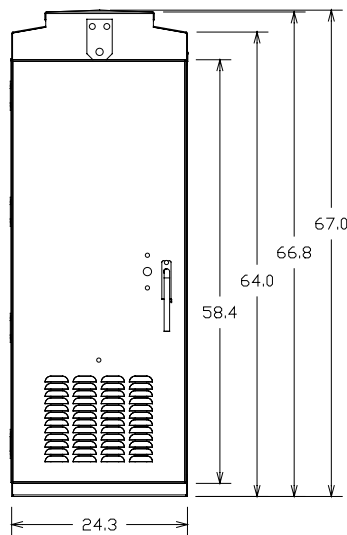

The McCain 334 CCTV Cabinet is a variation of McCain's standard 334 controller cabinet, custom designed to meet the specific requirements of CCTV applications.

Equipped with standard assemblies including a Caltrans CCTV Power Distribution Assembly, Caltrans CCTV Thermostat Assembly, and a Caltrans CCTV Fan Panel Assembly, the 334 CCTV meets all standard criterion to house a CCTV application making it a cost effective alternative to modifying an alternate model cabinet.

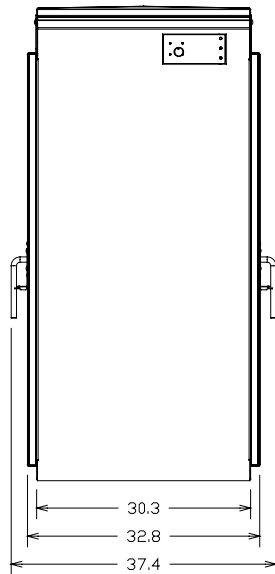

The cabinet is secured via a three-point latching system with Corbin or Best locks on each door for secure installations. The use of dual doors and multiple door stop positions (90 degree and 180 degree on both doors) promotes easy access for maintenance.
